PERSONAL PROFILE

Passionate about backend development, specializing in designing systems to handle massive loads efficiently while ensuring scalability and ease of future development.

EDUCATION

- Kasetart University

Bachelor's Degree in Software Engineering GPA: 3.10

LANGUAGE

- Thai
- English

EXPERIENCE

○ **June 2020 - Present**

LINE MAN Wongnai

Senior Software Engineer

- Developed backend systems for the LINE MAN application using Golang, and designed both RESTful APIs and gRPC services.
- Engineered and monitored systems to handle high request loads while maintaining optimal response times and service availability.
- Led the design of technical solutions, ensuring scalability and maintainability within the team.
- Collaborated with PMs to manage team workloads, balancing priorities and meeting deadlines.
- Automated testing processes to enhance code reliability and streamline deployment pipelines.

○ **Aug 2019 - Dec 2019**

Wongnai

Software Engineer(Internship)

- Developed backend systems for the Wongnai platform using Java Spring and Python.
- Worked with MySQL databases to manage and optimize data storage and retrieval.

○ **June 2019 - Aug 2019**

Offenburg University of Applied Sciences

Deep Learning Research

- Conducted research in deep learning applications, focusing on Emotion Detection and Face Detection.
- Built and tested models for real-time emotion and facial recognition.

SKILL

- Programming Languages: Golang, Typescript, Java
- Database: MongoDB, MySQL, Redis
- Message Queues: RabbitMQ, Kafka
- Tools & Platforms: Docker, Kubernetes, Prometheus, Grafana
- System Design:
 - Architecting backend systems for high-load environments.
 - Developing RESTful APIs and gRPC services.
- Team leadership and problem-solving abilities.
